About the Company

Integra IT Solutions FZE LLC (Formerly known as E-DOCS Solutions) was established in 2002 by a team of core software professionals endeavoring to provide best IT solutions to the industry. The company headquartered in Dubai for Marketing activities and Kochi, India for Technical Activities. The credit for the same goes to the organization's commitment to serve the industry in the best possible way by delivering value added services to the clients. In tune with the organization's philosophy are its highly motivated employees who believe in giving their best in whatever project Integra IT Solutions undertake.

Our Philosophy

We provide robust and proven solutions to our customers by focusing on reuse of existing designs and code. This reuse gives our solutions greater flexibility, improved performance and faster delivery. Instead of rediscovering and reinventing from scratch, e-docs believes in reusing the experience of the gurus of object-oriented technology, which is now becoming available in extensive libraries of frameworks and design patterns.

Our Mission Statement

Integra IT Solutions FZE LLC is established as QUALITY SOLUTIONS PROVIDER. Market share is our strategic objective. To our customers, we are dedicated to providing a fully functional, state-of-the-art software solution and any other related service. We pride ourselves in the level of personal service and attention given in order to help our customers achieve their objective. To our employees, we are dedicated in providing the best working tools available and ensuring that all employees are treated as partners in the organization. Our partners are measured by their qualification, competence, training and rewarded on performance.

Our Approach

Our product name itself strategies our approach. We have to achieve the objective to helping our customers THRIVE. We strive to look for patterns amongst projects, across customer requirements and within processes. Patterns in projects help us deliver solutions within budget; patterns in customer requirements help us understand business processes better; and patterns in processes help us meet project deadlines.

Our Quality Process

A unique blend of experience and theoretical foundation has enabled us to formulate a distinctive set of development processes at Integra Series. Our processes are composed of procedural descriptions, guidelines, checklists and forms. We continuously measure and monitor the compliance of our processes to established standards.

Products & Services

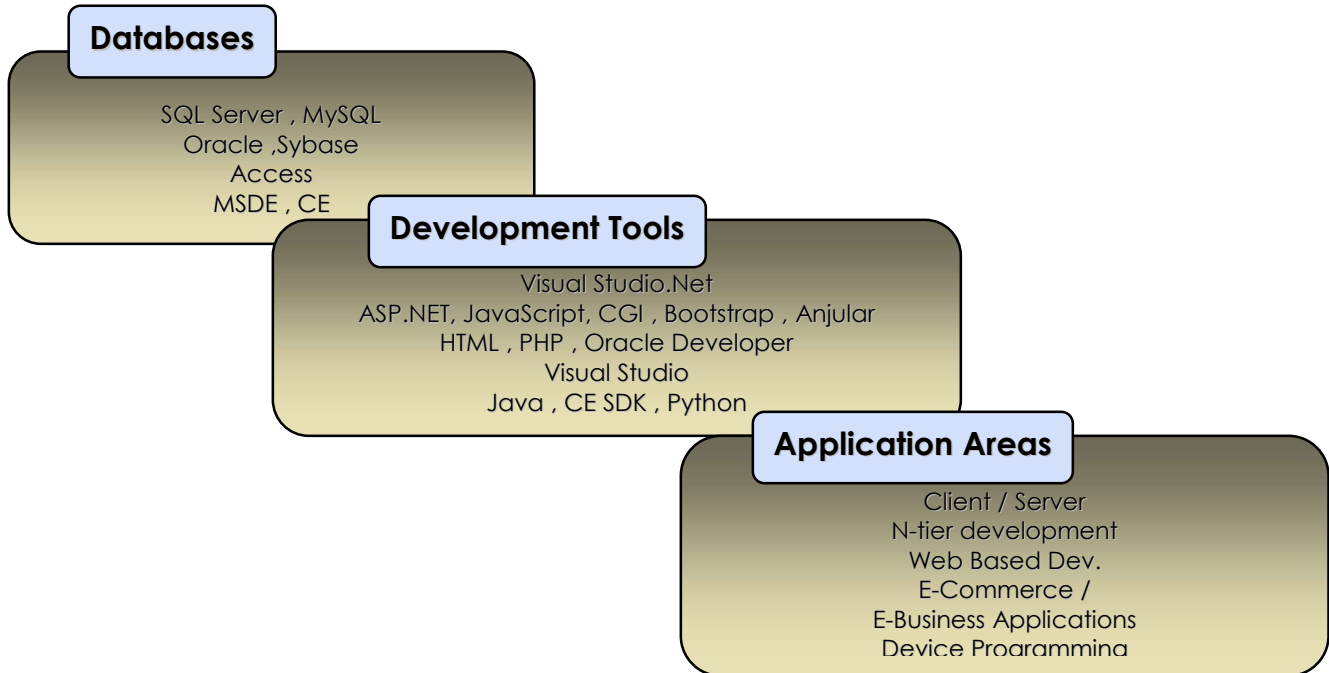

Our highly skilled team can provide you with an end-to-end solution starting from strategic planning to application design, development and deployment. We also provide consultancy and development services for a specific phase of systems development life cycle. Our experience of the latest technologies would relieve you from the maze of complex technology choices, and would make your transition to automation a simpler process .

Customized Software Development

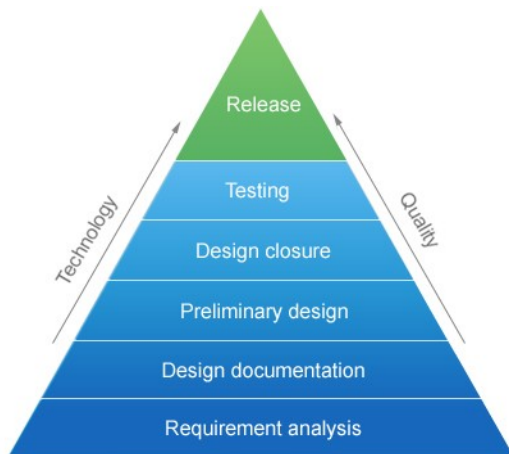

Integra IT Solutions provide a wide range of software development services through its strong team of experienced developers. We have expertise in stand-alone, multi-tiered client server and web-based solutions. Our methodology incorporates the demands and dynamics of outsourcing for offshore software development. The development process includes design, coding, documentation, quality assurance and testing through proven tools that ensure timely and cost-effective delivery.

Our Skill Set

- Strong Team if analysts, designers and architects
- Expertise in latest tools and methodologies
- Capability of taking complex development projects
- Management with both business and technology backgrounds
- In-depth knowledge of business process
- Ability to understand, communicate and fulfill business requirements
- Conceptual skills that provide flexibility to target new tools and environments

SOFTWARE DEVELOPMENT LIFE CYCLE CAPABILITY

DEVELOPMENT METHODOLOGY :

Our Standard methodologies are as follows :

- Structured System Analysis & Design
- Object Oriented Analysis & Design

However, if any particular project requires us to follow a different methodology, that methodology is defined during the initial planning stage and adopted as a standard methodology for that project.

Backed by Professionals...
